AM Best's API Services

Seamless Connection & Secure Access – Get Data Directly Into Your Own Systems Without Manual Intervention

The Advantages of Exchanging Data with AM Best via APIs

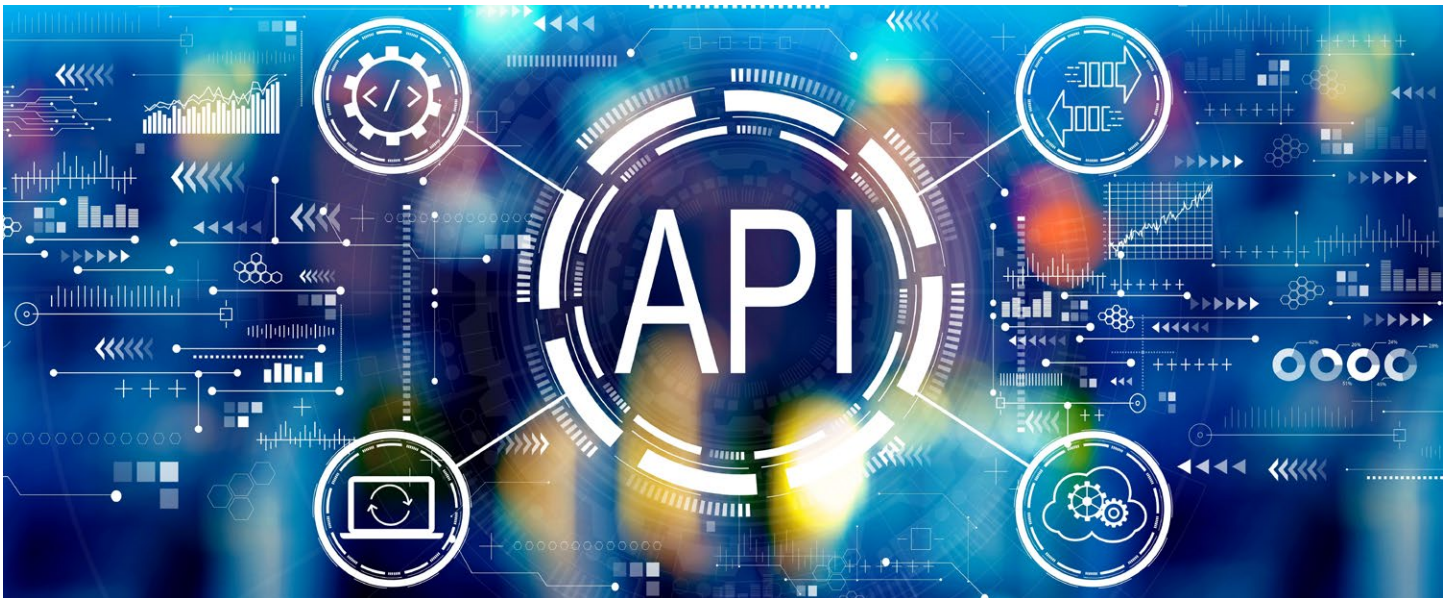

Every AM Best API (application programming interface) provides quick and easy access to data elements from our unmatched, proprietary insurance industry resources. APIs are an ideal way to smoothly integrate with AM Best and support your online or mobile systems with the most current information.

Benefits of APIs from AM Best

Enjoy Quick Access to Current Data: Instantly retrieve value-added data with a direct connection to AM Best to assess risk and do business knowing you are constantly using current information published by AM Best.

Boost Your Efficiency and Eliminate Errors: Streamline processes by automatically pulling current data into your system or workflow using APIs from AM Best. Always be in synchronization with AM Best.

Improve Decision Making: Combine your own information with the latest data from AM Best delivered by APIs.

How the API Is Set Up

- Our APIs are built on a **RESTful architecture**, ensuring seamless integration with modern web applications, business intelligence tools and actuarial software.
- **Standardized Format:** Our APIs deliver data in JSON format, making them lightweight and easy for developers to parse and map to internal databases.
- **Secure Authentication:** Our APIs are secured using the OAuth 2.0 industry standard, ensuring modern, reliable and token-based authorization for every integration. By leveraging OAuth 2.0, we provide our customers with a seamless and secure method to authenticate.

We Offer Guidance On:

- Which information available via API might best suit your needs
- Onboarding and integration
