BEST

Organization Structure

Now a prominent part of the *BestLink* Company Dashboard are details for: Rating Unit Structure, Data Structure and Corporate Structure. The Rating Unit Structure is new to *BestLink*, while the Data Structure and Corporate Structure have been enhanced within the Company Dashboard.

Rating Unit Structure

The Rating Unit Structure (5) contains the ultimate parent along with the company's own rating unit and also includes related rating units (if any) that fall under that ultimate parent. This structure provides a way to understand relationships between an Ultimate Parent (6) and its Rating Unit(s) (1), including the member companies associated with the rating unit(s).

Key Einancial Indicators															

Data Structure

The Data Structure (B) is based on the Corporate Structure, but also includes non-legal entities such as data records and AM Best groups, placing them within the structure where appropriate to help tie related financial information together based on legal entities. Please note that this structure may include companies no longer in business. Those companies are not assigned an AMB Ultimate Parent Number; however, data records and non-legal entities may be assigned this number.

This structure helps in understanding and analyzing financial statement data at the holding company, group/sub-group and insurance company levels (9) within an organization.

Corporate Structure

The Corporate Structure *intersection* identifies the overall ownership structure within which the current company belongs. The topmost entity, based on AM Best's analysis of the structure, is the Ultimate Parent (or for group records, the associated Ultimate Parent). Percentage ownership is provided where available.

This structure provides information about corporate and ownership relationships among holding company, group/sub-group and insurance company levels (2) within an organization.
